### DESCRIPTION

The **HCC40182B** (extended temperature range) and **HCF40182B** (intermediate temperature range) are monolithic integrated circuits, available in 16-lead dual in-line plastic or ceramic package and plastic micro package. The **HCC/HCF40182B** is a high-speed look-ahead carry generator capable of anticipating a carry across four binary adders or groups of adders. The **HCC/HCF40182B** is cascadable to perform full look-ahead across n-bit adders. Carry, propagate-carry, and generate-carry functions are provided as enumerated in the terminal designation below. The **HCC/HCF40182B**, when used in conjunction with the **HCC/HCF40181B** arithmetic logic unit (ALU), provides full high-speed look-ahead carry capability for up to n-bit words. Each **HCC/HCF40182B** generates the look-ahead (anticipated carry) across a group of four ALU's. In addition, other **HCC/HCF40182B**'s may be employed to anticipate the carry across sections of four look-ahead blocks up to n-bits. Carry inputs and outputs of the **HCC/HCF40181B** are active-high logic, and carry-generate (G) and carry-propagate (P) outputs are active low. Therefore the inputs and outputs of the **HCC/HCF40182B** are compatible. The **HCC/HCF40182B** is similar to industry type MC14582.
